

Vigilo

Empowering LEAs with Real-Time Location Intelligence

Vigilo is an AI-powered Location Intelligence Platform for Law Enforcement and Public Safety agencies — turning telecom and mobility data into real-time actionable insights for faster investigations, threat detection and emergency response, with full privacy and chain-of-custody compliance.

Key Capabilities

Crime Scene Analytics

Filter devices at crime location by time, dwell time, entry/exit, network type, etc.

Suspect Profiling

Visual timeline of device activity, zone visits, social graph, risk scoring.

Co-location Detection

Identify potential accomplices via movement overlap & proximity analytics.

Zone Surveillance

Real-time and historical tracking of sensitive zones, high-security infra.

Crowd Monitoring

Detect unusual congregation, loitering, or movement shifts.

Digital Evidence Management

Secure collection, handling & preservation with chain-of-custody compliance.

Designed For

National Police Forces

Crime Investigation Units

Intelligence &
Counter-Terror Agencies

Public Safety & Emergency
Response Authorities

Border Security &
Immigration Control

Disaster & Incident
Management Centres

High-Impact Use Cases

Crime Detection

Identify suspect devices near scene, trace their movements, and correlate accomplices.

Critical Infra Monitoring

Protect high-security facilities with real-time movement alerts and intelligence.

Border Security

Alert on foreign roaming devices, loitering near border infrastructure, or unauthorized zone access.

Protest & Riot Management

Live dashboards for decision-makers with zone heatmaps and resource mapping.

VIP & Event Security

Monitor crowd buildup, alert based on geo-fences and loitering analytics.

Why Choose Vigilo

Purpose-built for LEAs

With features validated by active officers

Telecom-integrated

supports mass location, passive and active data

Scalable

From city to state to national rollouts

Rapid Deployment

Cloud-ready or on-premise installation

Modular & Secure

Deploy only what you need, with full control over access

Analytics

Powerful Dashboards & Exportable Reports (PDF, CSV)
